Projects & Experience

Covid-19 Tracker Website / Project Tech Lead

November 2020 - December 2020

I created an initial concept for a mobile-responsive website, delegated tasks to a team of 3 that allowed for asynchronous productivity while maintaining collaboration, created a timeline to organize our efforts at accomplishing said tasks, and I personally coded some of the JavaScript functionality of our website, including, but not limited to the interactive map (which also works on touchscreen devices) and the performant delivery of accurate Covid-19 data.

Gensler / Student Intern

March 2019 - April 2019, Downtown Los Angeles

While working at Gensler, I rotated between facilities, I.T, and some basic architectural work . This included delivering mail across the office, assisting in computer maintenance, and assisting in the production and assembly of multiple hand-built scale models for client meetings. I also learned how to adapt to a rapidly changing work environment as a result of Covid-19.

Education

UCLA Extension / Coding Certificate

October 2020 - April 2021

Currently enrolled.

Da Vinci RISE / Highschool Diploma

August 2016 - June 2019

Having passed the CHSPE exam in the 90th percentile for Math and English, I was able to graduate highschool one year early.
